HIGH
PERFORMANCE & PREVENTION

So that nothing can stop you

PERFORMANCE

an overview

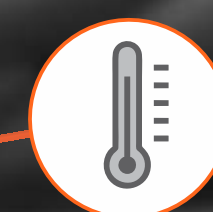

Humans were born to evolve. Evolve into finer beings day after day. The grit to become better is what keeps us going. This evolution is seen in every human that goes beyond their capabilities to achieve what's out of their reach. Sports people do it every day. That extra minute of running, that extra pound of weight, that extra effort to be the better self. All they need is that extra support and protection from injuries. That extra mile is what makes them better. That extra mile metamorphoses them into a super human. Tynor Sport is for all those sports people, beginners or professionals who are trying to be the super human in their game.

Weight Lifting Knee Wrap

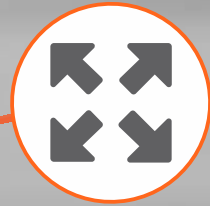

Color

Tynor's Weight Lifting Knee Wrap is a scientifically designed product to provide strong support, stability and protection to the knees. It helps to boost the leg strength and endurance during weight lifting, deadlifts, squats and similar intense leg exercises. Strong compressive force of the knee wrap increases the muscle density around the knee which helps to deliver more power from the same muscle. Knee wrap helps to store energy in the "Sit phase" of the squat and delivers the same in the "Stand phase". It warms up muscles and increases blood flow and flexibility of the knee tissue, thereby reducing the risk of injury.
